

SMART Board™

Interactive Whiteboard

Productivity Tools Go Beyond Desks

To be productive, groups need to use networks, files and websites – no matter where they are. Put this information at your group's fingertips with the SMART Board interactive whiteboard, so groups can work with the information they need, when they need it.

The SMART Board interactive whiteboard connects to your computer and a projector. With the touch of a finger, group members can interact with computer materials and their finger becomes the mouse. They can write with digital ink over anything and save their notes to a single file for easy distribution. They can wirelessly connect laptops and transfer control of the interactive whiteboard between users. Free software upgrades and an expansion slot for future hardware additions ensure that as your organization grows, the SMART Board interactive whiteboard grows with you.

Put It to Work for You

How can it help your organization? That depends on what you do.

Project managers capture progress notes and track decisions, then save the notes and e-mail them to stakeholders as a progress update. Designers use it to present plans to clients and incorporate their feedback immediately, saving valuable time during the design process. Fire departments create training simulators – ensuring staff receive realistic but safe training. Lawyers grab jurors' attention and help them understand evidence by presenting and interacting with the material. No matter where you are and what you do, the SMART Board interactive whiteboard can help maximize productivity.

"We believe with the SMART Board interactive whiteboard we've overcome the biggest challenge faced by lawyers. Juries are absolutely on the edge of their seats watching the information come to life. Evidence is no longer just heard. It's heard and seen."
